Open Shackle Stainless Steel Padlocks

The 200 series padlocks are constructed from high quality stainless steel which makes them ideal for use in marine or other corrosive environments. In addition, stainless steel is tough and provides high resistance to abuse attack. The toughened shackle is held in the locked position by a double ball locking mechanism. The lock is protected by a 5 or 6 pin key system, with a key retention feature in the unlocked position. In summary, this is a tough attractive padlock that will retain its performance and finish, even in hostile environments.

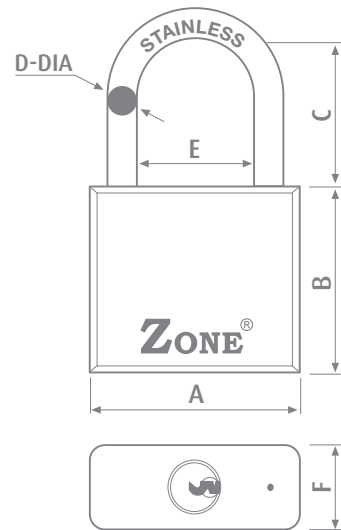

General Specification

- Function – open shackle
- Double ball locking
- Stainless steel body (316 grade)
- Stainless steel shackle (316 grade)
- Anti pick drivers
- Anti pick key profile
- Large range of key combinations
