

# 2700 Series

## Mini Digital Rim Lock

The Zone Mini Digital Lock is as robustly constructed as any other digital lock in our range, but in a neat compact body case measuring just 110mm high x 45mm wide, allowing the Mini Digital to be used where previously space was a constraint. These locks are easy to install using comprehensive instructions and, once installed correctly, will give years of service. Combination codes are easy to change and take just a couple of minutes. The deadlocking latch provides additional security. The locks come fitted as standard with the Zone handle pictured but other interchangeable handles/knobs, as illustrated, are available on request.

### General Specification
