

# 300 Series

## Closed Shackle Stainless Steel Padlocks

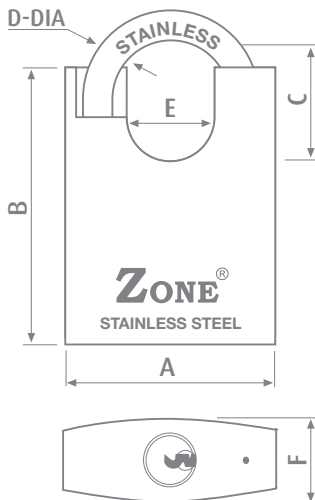

8

The 300 series padlocks are constructed from high quality stainless steel which makes them ideal for use in marine or other corrosive environments. The closed shackle configuration provides protection against attack by bolt cutters and, when used in conjunction with a security hasp & staple, provides high levels of security. Also the tough, robust properties of stainless steel provides high resistance to abuse attack. The toughened shackle is held in position by a double ball locking mechanism. The lock is protected by a 5 pin key system with a key retention feature in the unlocked position. In summary, this is a highly durable padlock that will retain its performance and good looks even in hostile environments.

### General Specification

- Function – closed shackle
- Double ball locking
- Stainless steel body (316 grade)
- Stainless steel shackle (316 grade)
- Anti pick drivers
- Anti pick key profile
- Large range of key combinations
- 2 brass keys, nickel plated
- Key retention
